HANDLING & FIELD REPAIR INSTRUCTIONS

After the products are installed.

Protect the product with a poly wrap over the entire product where possible.

Do not apply tape or other self-adhesive protection directly to the finished surfaces.

Take protective measures to ensure accidental damage does not occur.

If any service or parts replacement is required.

Extra caution should be taken to ensure damage does not occur.

Depending on the nature of the repair some touch up may be required.

Touch up paint

Codes for paint manufactures should be noted for local availability.

- Jet Black: Benjamin Moore 2120-10 (waterborne, 20 gloss or satin)
- Oxford White: Benjamin Moore CC-30 (waterborne, 20 gloss or satin)

A list of Axalta distributors in the US and CDA is available on the Axalta website. End users can go to any paint store as well such as Home Depot, Lowes, Benjamin Moore, Sherwin Williams, General etc.

Touch up procedure.

Touch up is intended for small blemishes or damage.

For larger areas requiring touch up or touch ups in obvious locations, finishing of a larger area or full component may be required. See paint manufacturer's instructions for application procedure.

Feather paint to the surrounding surface of the touch up area to reduce the contrast between existing finish and touch up.

Indentations or chips in the surface with require use of a wood filler prior to touch up. See filler manufacturer's instructions for application and use.
